

## REMARKS

### Status Summary

Claims 1-7, 9-18, and 20-22 are pending in the present application. Claims 1-7, 9-18, and 20-22 have been allowed.

### Specification

The specification has been objected to for various informalities. Applicants have amended the specification where considered appropriate to address the Examiner's concerns.

For example, the detailed description of the drawings section has been included in the specification. Care has been taken so that the language describing each figure in this section has been taken from other sections of the original specification as filed. Thus, applicants respectfully assert no new matter has been included and the new section is supported by the application as filed. For example, the description of Fig 1 is supported by page 5, lines 1-2 of the application as filed. The description of Fig 2 is supported by page 10, lines 1-2 of the application as filed. Further, the description of Fig 3 is supported by page 10, lines 9-11 of the application as filed. The description of Fig 4a is supported by page 17, lines 10-11 of the application as filed. Likewise, the description of Fig 4b is also supported by page 17, lines 10-11 of the application as filed. Finally, the description of Fig 5 is supported by page 19, lines 19-20 of the application as filed.

Further, the specification has been corrected to include the proper serial number for related application 09/625,824 entitled "Automatically Configuring A Web-Enabled Digital Camera To Access The Internet," previously misidentified as serial number 10/658,999.

## CONCLUSION

In view of the above, it is respectfully submitted that the present application remains in proper condition for allowance, and an early notice to such effect is earnestly solicited. The Examiner is respectfully requested to telephone the undersigned patent attorney at the below-listed number if, after reviewing the above Remarks, the Examiner

believes outstanding matters remain that may be resolved without the issuance of a subsequent Official Action.

Respectfully submitted,

Date: April 27, 2006
